Global eDNA Conference 2026
FAIR eDNA Workshop:
Mobilizing Data from Standards to Sharing

Resources

Data Standards

- Introduction to Standards
- GBIF Standards
- Biodiversity Information Standards (TDWG)
- Biodiversity Information Standards (TDWG): Social and Conceptual Infrastructure for Integrating Biodiversity Information
- FAIR Guiding Principles

Darwin Core

- DwC
- Introduction to Darwin Core (Marine Biological Data Mobilization Workshop 2025)
- What is Darwin Core, and why does it matter?

GSC

- Genomic Standards ConsortiumMinimum Information about any (x) Sequence (MIxS)

OBIS

- The OBIS manual
- OBIS Tutorials

GBIF

- GBIF and DNA
- GBIF Metabarcoding Data Toolkit
- GBIF Training and learning resources

MBON

- Marine Biodiversity Observation Network Tools

Video Tutorials

OBON FAIR eDNA Workshop 2026

1. Introduction to the Data Standard
2. FAIR eDNA Checklist
3. FAIRe-ator: Metadata Checklist Generator (Excel)
4. Populating Metadata Templates
5. FAIRe-fier: Online Metadata Validator
6. FAIReSheets Part 1: Generating FAIRe and FAIRe-NOAA Templates (Google Sheets)
7. FAIReSheets Part 2: Populating Metadata Templates, FAIRe2QIIME, FAIRe2NCBI
8. FAIRe Recap
9. BeBOP: Standard Protocol Formatting with Archiving and Version Control
10. Publishing eDNA Data in OBIS
11. edna2obis: Metabarcoding Data Publication Workflow for OBIS and GBIF

FAIRe

- Making eDNA FAIR
- OBON FAIR eDNA Workshop

Ocean Biomolecular Observing Network (OBON)

- OBON

Better Biomolecular Ocean Practices (BeBOP)

- BeBOP-OBON

NOAA Omics

- eDNA2OBIS
- Ocean DNA Explorer
- FAIReSheets
- NOAA AOML Protocols
- NOAA PMEL Protocols
- NOAA Omics Data Management Guide
- NOAA Omics Technical Portal
